

# FasTrak for OpenText™ Brava!™ and OpenText™ Blazon™

Gain a competitive advantage with OpenText embedded viewing  
and automatic document transformation

## Why partner with OpenText?

### It's a digital world. Come join us.

**26%** The increase in profitability for organizations that are leaders in digital transformation

**14%** The number of enterprises that are digital transformers

**75%** The portion of the S&P 500 that will fall out of the index in the next 15 years

**\$30B** The size of the Enterprise Information Management market each year

**OpenText Enterprise Information Management (EIM)** solutions help organizations adapt to a rapidly changing market and workplace. More importantly, they enable organizations to thrive in the digital world.

As an OpenText OEM partner, you can embed reliable, proven OpenText technology in your products as a seamless part of the user experience. By embedding industry-leading solutions like OpenText™ Brava!™ and OpenText™ Blazon™, you can use OpenText's expertise to increase the value of your offering.

When you choose **OpenText FasTrak**, our experienced Professional Services team will handle the integration while your team concentrates on the core capabilities of your solution.

### Professional Services

OpenText Professional Services brings together approximately 2,800 EIM professionals to help customers build and execute on their digital strategy. Our team of experienced professionals has completed more than 20,000 implementations for more than 10 million users with a proven and repeatable methodology.

With OpenText Professional Services, you are working with consultants who average more than 10 years of experience and give you direct access to OpenText Engineering and Product Management. Customers accelerate, enhance and de-risk their projects by leveraging EIM expert services from planning to implementation, operation, training and continuous improvement.

Through a range of FasTrak and Optimize Assist packages, customers unlock the full value and benefit from decades of experience providing best practices managing a Brava! or Blazon investment.

## WHY CHOOSE BRAVA! OR BLAZON?

- Lower operational costs by improving efficiencies and streamlining processes
- Save money by using a single application for viewing and collaborating on all documents
- Protect sensitive information and meet data security requirements
- Achieve compliance and document control standards

Let OpenText™ Brava!™ and OpenText™ Blazon™ remove your customer challenges while meeting your own requirements.

## The technology

### Brava!

Brava! is a secure, browser-based, universal viewer that enables workers to view and collaborate on content. It is the perfect balance of accessibility and security, helping organizations operate efficiently while meeting compliance objectives. With Brava, users can:

- Accurately view and collaborate on practically any file, including Microsoft® Office documents, PDFs, CAD drawings and images, without needing the native applications.
- Easily access content anywhere with the zero-footprint HTML client, including on PCs, Macs and mobile devices.
- Quickly review and approve content.
- Easily remove sensitive information with simple redaction tools.

### Blazon

Blazon is an advanced rendition engine that can take files in virtually any format and transform them to accurate PDF, TIFF or secure Content Sealed Format (CSF) renditions. Blazon automates time-consuming manual processes, reduces document transformation costs, strengthens control and compliance and improves content accessibility. With Blazon, users can:

- Transform documents to PDF, TIFF or secure CSF.
- Include banners or watermarks.
- Add password protection or other security features.
- Remove sensitive information automatically, according to business rules.
